Proactively monitoring emotional wellbeing

Monitoring online activity is an important task when looking after the emotional wellbeing of your pupils and one where attention to detail is essential. Every single word typed by a child or young person could lead to a mental health concern.

Through our Digital Monitoring service, our team of analysts can monitor all digital* activity on your behalf – saving you time and providing you with a thorough and proven process for monitoring while supporting your mental health strategy.

*Digital as not only covering online activity but applications, email etc. while using a digital device.

How it works

We will monitor all PCs and Macs in your school running specialist monitoring software, analysing screen captures on your behalf. You will be alerted instantly to any mental health concerns such as suicide, self-harming, sexual behaviour, bullying, drugs and family issues etc. and will receive regular summary reports that are assessed according to the level of risk in line with guidance from Child Exploitation and Online Protection (CEOP) Centre, NSPCC, Internet Watch Foundation and British Standards Institute Specification PAS 74: Internet Safety - Access control systems for the protection of children online.

Missing a potential online concern is not an option as every second of concerning activity counts. Our monitoring service provides a constant view of activity meaning that no concerns are missed and all incidents are reported in a time sensitive manner.

Allow us to free up your time and support you to implement an effective mental health monitoring service that meets national advice and guidance when keeping children and young people safe in education.

Benefits

- You will adhere to the statutory guidance - 'Keeping Children Safe in Education'
- Provides confidence that digital and online activity is being monitored at all times
- Mental Health and Safeguarding concerns are rated according to the risk level allowing you to react quickly to concerns that pose the highest risk
- Regular summary reports will provide you with a wealth of evidence for Ofsted and your Governing Board
- Frees up staff time and reduces the burden on your team
- No major changes are required – your web experience will not be limited and there is no need for excessive network management
- Lessons will not be affected, staff and pupils can continue as normal
- Our team of analysts have been trained and specialise in spotting potential mental health and safeguarding concerns
- We work closely with behaviour and safeguarding experts, so we have a holistic view of safeguarding and mental health
